

# Water Watch Report

Denver Water

As of August 30, 2010

## Individual Reservoir Storage

8/30/2010

Reservoir	Capacity (acre-feet)		Current Usable Contents (acre-feet)	Percent Full [2]		
	Total	Usable [1]		Current	Last Year	Historic Median
Antero	19,881	19,826	19,717	99%	99%	100%
Eleven Mile	97,779	97,779	98,698	101%	102%	103%
Cheesman	79,064	79,064	77,976	99%	93%	94%
Marston	19,796	12,955	10,268	79%	86%	60%
Strontia Springs	7,863	7,163	6,795	95%	96%	93%
Chatfield	27,428	11,134	4,748	43%	93%	57%
Dillon	257,304	249,095	243,439	98%	99%	98%
Gross	41,811	29,811	24,377	82%	93%	85%
Ralston	10,776	7,276	5,750	79%	75%	87%
Meadow Creek	5,370	4,520	4,590	102%	102%	74%
Williams Fork	96,822	95,822	91,163	95%	93%	88%
Wolford Mountain	65,985	25,610	25,610	100%	100%	100%
<b>Total System</b>	<b>729,879</b>	<b>640,055</b>	<b>613,131</b>	<b>96%</b>	<b>97%</b>	<b>92%</b>
Less West Slope Replacement [3]	162,807	121,432	116,773	96%	95%	89%
Less Strategic Water Reserve [4]	120,000	120,000	120,000	100%	100%	100%
<b>Available Total System</b>	<b>447,072</b>	<b>398,623</b>	<b>376,358</b>	<b>94%</b>	<b>97%</b>	<b>91%</b>

[1] Usable contents and capacity excludes any water that is normally not used due to physical, legal and/or operational constraints.

[2] Percent full figures are based on usable contents and usable capacity. In previous versions of this report, percent full was based on total contents and capacity.

[3] The West Slope Replacement is storage water contained in Williams Fork and Wolford Mountain Reservoirs. This water is used for water trades and cannot be delivered directly to Denver Water's customers.

[4] The 120,000 acre-foot Strategic Water Reserve provides a hedge against unforeseen circumstances such as infrastructure failures and higher than expected water use.

NOTES: Soda Lakes, Long Lakes, Platte Canyon and Harriman Reservoirs are excluded from the table for the sake of simplicity. These reservoirs comprise less than one percent of system-wide capacity. Although Denver Water does not own Chatfield, Meadow Creek or Wolford Mountain Reservoirs, a portion of the water in each is available to Denver Water.

## Average Daily Use
